

Provides tolerance to 2,4-D Choline, glufosinate and glyphosate herbicides. Strong Sclerotinia white mould, resistant to brown stem rot and stem canker. Rps 1k phytophthora gene with very good field tolerance. Highly suitable when positioned on high-yield environments and no-till practices. Adaptable to all row widths. Great row spacing flexibility. Maintains its height and shows excellent width under stress. Nice clean look and highly uniform. Visually attractive with very strong standability.

PRODUCT FEATURES

- Very strong, high yielding ENLIST™ variety for early MG II that has proven to be a lead product
- Value-added SCN and Phytophthora Rps 1k
- Provides tolerance to 2,4-D Choline, glufosinate, and glyphosate herbicides
- Strong defensive characteristics that exhibits in many different environments and production practices
- Yield performance detaches itself from standard MGII checks
- Position with confidence and push it for high-end yields
- Elite, top-end yield with clustered and finished top pods
-

All orders and sales are subject to the PRIDE Seeds Terms and Conditions of Sale, which include but are not limited to the Limitation of Warranty & Remedy and Agronomic Zone and Planting Year. All Terms and Conditions of Sale are subject to change from time to time without prior notice. PRIDE® & Design, P® & Design, Advantage Acre®, and Pride Advantage Acre® & Design are registered trademarks of AgReliant Genetics Inc. Characteristics are assigned by PRIDE® based on comparisons with other PRIDE® products (not competitive products) through in-house field testing. Individual results may vary, and performance may vary from location to location and from year to year. This result may not be an indicator of results you may obtain as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible.

ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. It is a violation of federal law to use any pesticide product other than in accordance with its labeling. NOT ALL formulations of dicamba or glyphosate are approved for in-crop use with products with Roundup Ready 2 Xtend® soybeans. ONLY USE FORMULATIONS THAT ARE SPECIFICALLY LABELED AND APPROVED FOR SUCH USES. Contact the Pest Management Regulatory Agency with any questions about the approval status of dicamba herbicide products for in-crop use with Roundup Ready 2 Xtend® soybeans or products with XtendFlex® Technology. Roundup Ready® 2 Technology contains genes that confer tolerance to glyphosate. Roundup Ready 2 Xtend® soybeans contains genes that confer tolerance to glyphosate and dicamba. Glyphosate will kill crops that are not tolerant to glyphosate. Dicamba will kill crops that are not tolerant to dicamba. Contact your Bayer retailer, refer to the Bayer Technology Use Guide, or call the technical support line at 1-888-283-6847 for recommended Roundup Ready® Xtend Crop System weed control programs.
